

## ATTACHMENT A – Current Plan Language Edition 2007

### CURRENT COMPREHENSIVE PLAN TEXT PAGE 79

**SCALE AND SITING OF NEW BUILDINGS** Where feasible, incorporate architectural features at the street level that relate to human size and increase the pedestrian comfort level. Incorporate urban design elements, such as trees, benches, special pavement treatments, awnings, setbacks, tapered building heights, browsing areas, lighting and plant materials to visually soften the harder architectural features of the building and create an attractive pedestrian-friendly environment that will reinforce retail activities.

The following guidelines should be used to determine the appropriate scale and site location of new buildings:

1. Where feasible, orient commercial buildings toward the road with parking lots to the side and rear to create an urban atmosphere. Where buildings are oriented to the road, no minimum front yard is required except as needed for the streetscape treatments described above.
2. Site buildings to discourage large expanses of parking adjacent to and visible from roadways.
3. Cluster buildings to reinforce a neighborhood style or ambience, where appropriate.
4. Site buildings with respect to natural topography and other environmental and historic features

### **ATTACHMENT B PROPOSED COMPREHENSIVE PLAN RECOMMENDATION:**

**SCALE AND SITING OF NEW BUILDINGS** Where feasible, incorporate architectural features at the street level that relate to human size and increase the pedestrian comfort level. Incorporate urban design elements, such as trees, benches, special pavement treatments, awnings, setbacks, tapered building heights, browsing areas, lighting and plant materials to visually soften the harder architectural features of the building and create an attractive pedestrian-friendly environment that will reinforce retail activities.

The following guidelines should be used to determine the appropriate scale and site location of new buildings:

1. Where feasible, unless required for Green Building Certification, orient commercial buildings toward the road with parking lots to the side and rear to create an urban atmosphere. Where buildings are oriented to the road, no minimum front yard is required except as needed for the streetscape treatments described above.
2. Site buildings to discourage large expanses of parking adjacent to and visible from roadways.
3. Cluster buildings to reinforce a neighborhood style or ambience, where appropriate.
4. Site buildings with respect to natural topography and other environmental and historic features

## **ATTACHMENT C: VISION AND JUSTIFICATION**

There are oversights or land use related inequities in the adopted Plan that affect the area of concern.

The current text of Item 1 above has been an obstacle to implementing the County Policy to encourage the LEED certification of buildings by dictating building orientation.
