Subject: RE:SE 2018-MV-007 National Trust For Historic Preservation in the United States, SE 8907,8900&9000 Richmond Hwy

I would like to provide the following comment reference SE 2018-MV-007 (8907,8900 & 9000 Richmond Hwy)

FT Belvoir is concerned with the stormwater and the erosion and sediment control that impacts Dogue Creek watershed. Sedimentation is a critical concern for our mission requirements. The traffic may be an issue and we request a review of the traffic analysis used to develop this property. We also have concerns with activities adjacent to our boundary which will require us to relook at the physical security stand-off requirements at Lewis Village and adjacent to the Friends Meeting House.

Please keep us informed as you develop the details on this project.

Dan
